PACKING SERVICE

Regarding the packing, we usually use very good quality and very hard neutral carton box and master box, it can keep the goods safely during transportation. We will also make your appointed colorful brand packing if your order is with big quantity and big amount.

SHOW ROOM

We have a big show room in our factory, which show many hot items and new items. You can know our quality from our show room products.

PRODUCTION LINE

PRODUCT MATERIALS

BODY PARTS MAIN MATERIAL

With the New Millennium, the materials used in the production of bodyparts have changed, going from metals to plastics.

Freecars, too, introduced into its production many components in mixed plastics, by adopting advanced production processes and ensuring the complete equivalence of products with the original.

SMC (Sheet Moulding Compound) – UP GF 30
ABS (Acrylonitrile-Butadiene-Styrene)
PC (Polycarbonate)
PA (Polyamide – Nylon)
PMMA (Polymetyl Methacrylate)
PP (Polypropylene)
PU (Polyurethane)
POM (Polyoxymethylene)
UP (Unsaturated polyester- SMC)
PVC (Polyvinyl Chloride)
ASA (Acrylonitrile-Styrene-Acrylate Terpolymer)
PBT (Polybutylene Terephthalate)
Metal (Steel, Aluminium.....)

We are looking forward to cooperating with you; we sincerely hope we can become your powerful business partner in China. Warmly welcome your inquiry !

CERTIFICATES

Since its foundation, Freecars is in the Aftermarket as manufacturer of quality components. Its products are compliant to OEM level. In order to enter European market and expand our business, we already get the Emark for many auto lighting. Since 2008 Freecars cooperate with Russia logistic and local company and get the Gost-R certification for exports to Russia market. As proof of its quality, since 2011, the company has received certification by one of the most important certification company: ISO/TS 16949: 2009

PRODUCTION PROCESS

PRODUCTION INTRODUCTION

1. SMC Products

- 1.1 Put the SMC material into the mould in the high hydraulic machine for pressure, after the setting time, take out of the semi-finished products, and take out the screw from the products.
- 1.2 Mending the edge of the semi-finished products by electric saw.
- 1.3 Painting the surface of the products
- 1.4 Air drying the products
- 1.5 Packing the goods by good material carton

2. Plastic Model Product

- 2.1 Setting the mould into the Injection machine.
- 2.2 Put the plastic granule material into the injection moulding machine, the plastic granule material usually is PC, ABS, PMMA, PP etc, and we always use new and good materials for productions.
- 2.3 Heating the machine for injection
- 2.4 Taking out the products from the moulds
- 2.5 Mending the edge of the products
- 2.6 Packing the goods by good material carton

3. Lighting Production

- 3.1 Prepare well all the spare parts including lens/glass, base, socket, screws, reflector, circuit board etc.
- 3.2 Assembly the spare parts together
- 3.3 Testing the lighting
- 3.4 Packing the goods by good material carton.

QUALITY CONTROL

1. The quality of Freecars products is being tried to equivalent to the Original Equipment Manufacturer (OEM) parts in: [Size](#) / [Weight](#) / [Materials](#) / [Processes](#) / [Appearance](#) / [Color](#)
2. We have our own injection machine, high hydraulic machine and assembly workshop, and efficient technical team which control all the products from shape design to internal optimization by excellent skill.
3. We've got the certificate from ISO/TS 16949: 2009 international quality certification system. We have strictly control on every step during production, even some details from sheet metal to each screw. Every step of working procedure is monitoring and signed. Finished products have delivery inspection, and qualified products can be sent to customers.
4. All products are subject to several quality control at every stage of production.
